2013 Chevrolet Caprice PPV – Los Santos Police Department – Unmarked for Grand Theft Auto V

Discuss the mod and stay updated on modding-forum.com.

Version	1.1C
Optimized for	Police4
Lighting equipment	Federal Signal Cuda TriOptic
ELS Support	ELS-V 1.05
Multiple Liveries	Supported

Credits

- Original vehicle model is Pontiac G8 from Forza, edited into the 2013 Chevrolet Caprice PPV by Kane104. Model assembled with contributions from EVI in the form of a scratch modeled front bumper and bonnet, whilst all other model edits such as the rear end and interior were performed by Kane104.
- Interior console, Federal Signal ES100 siren speaker, template, rims, interior texture edits by Kane104.
- Dirtmap, liveries, LSPD MDCS texture, Federal Signal Cuda TriOptic, ELS setup and configuration files by Cj24.
- Hubcaps modeled by Ridgerunner, modified by Cj24 and Kane104.
- Federal Signal Smart Siren controller (mapped to textures by Ridgerunner), Motorola radio, Dell notebook and tyre textures by EVI.

Terms of use

You may:

- Replace or edit textures for personal use.
- Create and redistribute liveries of your own using the provided template.

You may not:

- Circumvent any protecting measures to edit models.
- Use any of the work included in this archive for your own financial gain.
- Redistribute this archive and its contents on any other website other than modding-forum.com without permission.

Installation

If possible, use OpenIV's mods folder instead of replacing original files! For more detailed installation instructions for vehicle mods, review [this guide](#).

Use OpenIV to add all files in the Vehicle Files folder to

`\update\x64\dlcpacks\patchday13ng\dlc.rpf\x64\levels\gta5\vehicles.rpf.`

Open `Config Files\carvariations.meta.txt` with any text editor and copy the complete content.

Export `\update\x64\dlcpacks\mpchristmas2\dlc.rpf\common\data\carvariations.meta` using OpenIV, open it with any text editor, create a new line between `</item>` and `</variationData>` and before the first paste the previously copied content. Replace the original `carvariations.meta` with the edited one.

Copy the `Config Files\police4.xml` file and paste it into `\ELS\pack_default`. If you use a custom pack, add it to its folder.

To install the car in a different slot, change the names of the `.yft`, `.ytd` and `.xml` files, the `<modelName>` value of the `carvariations.meta` settings and the `<modelName>` and `<txdName>` values of the `vehicles.meta` settings respectively.

Optionally, if you don't use any light enhancing mods, replace
\\update\\update.rpf\\common\\data\\visualsettings.dat with Config
Files\\visualsettings.dat using OpenIV.

Notes

This mod requires ELS-V (Emergency Light System) version 1.05 to work properly.

Changelog

1.1C: Fixed mirror not being black: Livery_sign_1.dds replaced.

Files included

- police4.yft
- police4.ytd
- police4_hi.yft
