Disclaimer

- This pack is currently in **beta** phase. Bugs are to be expected and can always be reported to me.
- **Nobody** is allowed to share this pack. I decided to give it out as a Beta so people from the places where it is released can enjoy it. If I wanted it put up somewhere else, I'll do it myself.
- **Nobody** is allowed to steal these models (I know it sounds dumb, but you never know with people 😊)
- **But...** All I want is people to enjoy these (accurate) Belgian Emergency Vehicles! Sadly I did not have any other car models to use, but that may come soon!

P.S Here's a screenshot for an upcoming project...
